Maid / Mom Initials: _____

Patsy's is not responsible for incorrect measurements received or sizing. Please review the appropriate size chart to determine your correct size. Note that hips should be measured 7" below the waist and the waist should be measured at the smallest part of the waist. Your dress size should be determined by your largest measurement. Alterations and pressing are not included in the price of the gown. These services are not available at Patsy's, however a list of local seamstresses can be provided upon request. *Please note: maid / mom dresses are not custom fitted – they are cut to the proportions indicated by the designer's size chart. Correct sizing may result in one or more areas of the dress requiring alteration. It is crucial that the largest relevant measurement be accommodated, or the dress may end up being too small in that area.*

Payment for the gown is due in full when placing the order. All sales are final. It is the responsibility of the customer to pick up the item upon its arrival to our salon or organize shipping for an additional fee.

I acknowledge that I have read the above information and that my information is accurate. I agree to abide by the "Terms of Sale" Agreement that the bride signed on my behalf; a copy of which will be provided to me upon my request.

Helpful Hints

MEASUREMENTS	Make sure the bridesmaid is wearing the undergarments she will be wearing with the bridesmaids dress. Keep the tape straight, ensuring it doesn't fall lower in the back.
PLUS SIZES	All styles available in plus size for an additional charge. See "Delivery Chart & Special Fees".
BUST	Measure under the arms, across the fullest part of the bust.
WAIST	Measure around the natural waist.
HIPS	Measure around the widest part of the hips.
ADDITIONAL LENGTH	An additional 5 inches can be added to the gown length.
Should you need more assistance, please contact Customer Service.	
Sizing & fit are subject to standard commercial tolerances.	

DESSY | MASTER SIZE CHARTS

2017

bridesmaids			
<p>Our master size chart reflects a body measurement NOT a dress measurement. It is important to keep in mind that our dresses have approximately 1.5" ease built into the patterns to allow for movement.</p> <ul style="list-style-type: none"> The bust measurement on strapless styles will be approximately the same as the bust measurement on our master size chart. We now also provide specific dress measurements to help you further pinpoint sizing. These specs are available on www.retailer-response.com. We will be sending a dress spec section for your lookbook in early January. Maternity styles use the bust measurement only. It is very important that you refer to our sizing information when choosing sizes for your customers. Please do not rely on samples as an accurate sizing reference as they can grow in length after hanging on the rack and stretch in size as they are tried on by customers. Please make sure that the measurements are taken over undergarments or tight fitting clothing. Pull the tape snugly to get the most accurate measurement. Extra length is recommended for anyone 5'7" or taller who will be wearing a 2" heel or higher. (Extra length availability is subject to style. Please refer to the style detail page in your lookbook or on the website). Alterations are often needed to achieve a "perfect fit". 			
SIZE	BUST	WAIST	HIP
